HOŞGELDİNİZ
WELCOME
BİGA TİCARET VE SANAYİ ODASI
Biga Chamber of Commerce and Industry

We do not have any documents but the fact that our district, in 1930s, had a chamber of commerce and industry is known from the documents and receipts.

The founder of our chamber was Hüseyin R. Uysal, the first chairman of council was Tayyip Demirtaş and the first chairman of board of directors was Tefik Emin Başarır.

The activities of our chamber first took place in rented buildings in Bayram Street and Çan Avenue.

The construction of three-storey commerce building was started in 1985 and finished in 1989. Since 1986, it carries out its activities there. Its ground floor has been turned into a local for our members.

Biga Chamber of Commerce and Industry is still managed by the board of directors containing 7 members and assembly of chamber containing 22 members.

Our chamber has over 1625 registered members from 9 profession groups.

Biga Chamber of Commerce and Industry is a long-established institution of South Marmara, which has a great agricultur el and industrial development. Biga, the historical-economical center of Çanakkale, is the center of regional development. There are 40 thousand people in the town center and its total population is 85 thousand with the villages and towns.

Turkey's economic centers Istanbul and Northwest Marmara is no longer come to the point of obstruction and Biga has drawn the attention of national and international financiers. This rapid change, particularly in regional strategic plans, urgently needs a planned development without bringing agriculturel and environmental problems.

In this sense, Biga, whose 47 percent area is forest, is Turkey's important milk, meat, rice, vegetable and fruit center with 107 villages and 5 towns. This situation has lead to its known as Holland of Turkey.

Since 1973, Biga leads regional economy. It has 9 profession groups and totally 1625 registered members. In the last 5 years, the increase in the number of members about 20 percent and in the number of institutional membership 30 percent are a clear indication of regional development.
