

□ According to TOBB Law (No 5174); our Union is assigned to analyse and determine applications about fairs in Turkey, and to give “Certificate of Authority” to fair companies.

Our Union has been carrying out this duty within the context of “The Procedures And Principles Regarding Organizing Fairs In Turkey”

The main objectives of these Principles are to develop fair sector in line with the general interests of the Country and sector, to make the sector attain global standards and within this context, to provide arrangements of fair activities to be made by competent companies within a program in appropriate fields.

With the purpose of effective and comprehensive promotion of the fairs in Turkey and considering the need for a source that can be used during the year, our Union annually publishes and distributes “Turkey Fair Guide”.
